

# ADRA<sup>®</sup> ANALYTICS

Gain Meaningful Insights with Complete Access  
into Your Financial Information

The Adra Suite of Solutions is built for mid-sized companies. Its intuitive design ensures that each product is easy to learn and use. Since the entire suite is centrally hosted in the cloud, you can take advantage of a software as a service (SaaS) solution that is easy to implement at a lower cost than traditional software deployment. And it's scalable.

## ADRA® ANALYTICS

### Create tailored reports to enhance your financial close processes

You want further visibility into your financial close process in order to avoid repeating the mistakes of the past, spot areas for improvement and increase the efficiency and quality of your financial close. You want to use the time saved from digitizing your financial close with Adra® Balancer and/or Adra® Task Manager to analyze your current status as well as trends over time to achieve a best in class financial close process.

Adra® Analytics by Trintech puts control back in your hands with accurate, up to date reporting capabilities that ensure you have full visibility into your close process. By giving you a full range of motion into Adra Task Manager and Adra Balancer data, Adra Analytics allows you to narrow in on the details you need, as well as zoom out and see the bigger picture of how your month-end is impacting your company's financials. With Adra Analytics, you can now track every activity throughout one period, or over several, to give you clearer insight into how your company is maturing.

### HOW ANALYTICS WORKS

#### The Power of Data

Adra Analytics allows you to fully access information from both Balancer and Task Manager through a BI toolkit such as Power BI, Excel, Tableau and any other application supporting OData v4. This means you can create any perspective that you want and track against the KPIs of your choosing. This fully opens up the world of possibilities when it comes to dashboard reporting, which can be the most helpful form of strengthening your close process.

#### Full Access to Information

Gone are the days of asking for screenshots and printouts, which fill up your inbox, or lead to sky-high stacks in your office. Adra Analytics offers you all the information you could ask for in one consolidated location, meaning you now have a one-stop-shop for all of your financial close reporting needs.

#### Meaningful Insights

Through Adra Analytics, you are now able to view information pertaining to your close in the reporting tool of your choice. While we will get you started with pre-configured reports, you can also configure reports yourself in tools such as Power BI, Excel or Tableau, meaning we meet you where you already are. You will be able to view your Adra data alongside data from other sources, such as your ERP, giving you the insight into your month-end right alongside non-close related activities.

## KEY BENEFITS

- Full visibility into the close process
- Unlimited reporting capabilities
- Tailored reports and dashboards to fit your needs
- Identifies opportunities for increased efficiency and quality

*Having used Adra Analytics for a few months, we now have full visibility into the quality and efficiency of our close process.*

*We can identify which areas we are doing well, and which areas need improvement. This insight has enabled us to accelerate our financial close process significantly.*

## WORLD-CLASS FINANCIAL OPERATIONS & INSIGHTS

Trintech Inc., a pioneer of Financial Corporate Performance Management (FCPM) software, combines unmatched technical and financial expertise to create innovative, cloud-based software solutions that deliver world-class financial operations and insights. From high volume transaction matching and streamlining daily operational reconciliations, to automating and managing balance sheet reconciliations, intercompany accounting, journal entries, disclosure and fiduciary reporting and bank fee analysis, to governance, risk and compliance—Trintech’s portfolio of financial solutions, including the **Cadency® Platform**, the **Adra® Suite**, and targeted tools, **ReconNET™**, **T-Recs®**, and **UPCS®**, help manage all aspects of the financial close process. Over 3,500 clients worldwide—including the majority of the Fortune 100—rely on the company’s cloud-based software to continuously improve the efficiency, reliability, and strategic insights of their financial operations.

Headquartered in Dallas, Texas, Trintech has offices located across the United States, United Kingdom, Australia, Singapore, France, Germany, Ireland, the Netherlands and the Nordics, as well as strategic partners in South Africa, Latin America and Asia Pacific. To learn more about Trintech, visit [www.trintech.com](http://www.trintech.com) or connect with us on LinkedIn, Facebook and Twitter.

*We wanted to make our data gathering smarter to eliminate the opportunities for delay and bring it all together in a much more streamlined way. It was critical to us to deploy a financial close solution that would help standardize our data and ensure we are being as efficient and effective as possible in our closing process each month.”*
